

Description of the installation of the enclosed XMIT-FILE.

Transfer the attached XMIT-FILE binary to the HOST.

After the successful transfer, send the following command using TSO Commands:

receive indsn('XMIT.RECEIVE.FILE')

After the successful receive command, the following file should exist.

USERID.BS.DELIVER.V1.INSTALL

The following members are included in this file:

ADMIN

DATA

RULES

SKELS

BSJDELIV

The member BSJDELIV contains the Installation Job-Control. Please prepare the SET statements to your needs and submit this Job.

In library **.DELIVER.V1.ADMIN.CNTL there is a Job-Control Example. → BSSJVSFL

This Job-Control contains the Administration run. It is sufficient to submit this job once first. In production mode, the job should be run every 24 hours.
